

Submission Point 2 (5%)

TEAM ID	Group 4
Personas	This is excellent. The report contains three personas that meet the document's requirements and would be helpful during your design process.
User storyboards	The three storyboards provided match the briefs and would be useful for your design and development process.
Information architecture report	The document details how the card sorting and tree testing were carried out. For clarity purposes, it would be good if you could explicitly state in the document the site you've used for the activities.
Site plan	The site plan is clear, straightforward and understandable. However, I suggest you check again if there is any misrepresented category. For instance, the site map category is unnecessary and should be removed.
Overall feedback and mark	The group provides excellent responses to the documents. However, I suggest you check and review the documents again before the final submission. Mark: 4.5/5
